

For Immediate Release

MITEM® CORPORATION ANNOUNCES SIEBEL SYSTEMS VALIDATION

MITEM Successfully Integrates MitemView® 5.3 With Siebel eBusiness Applications

Menlo Park, CA, April 30th, 2001– MITEM Corporation, a leading provider of legacy integration software for conducting real-time eBusiness, today announced that the integration between its MitemView 5.3 and Siebel eBusiness Applications has been successfully validated by Siebel Systems. Siebel Systems, Inc. (Nasdaq: SEBL) is the world's leading provider of eBusiness applications software.

MitemView is a real-time, message-oriented integration system that is used to rapidly integrate Siebel eBusiness Applications with existing legacy systems. It combines a non-invasive message-processing engine with an event-driven application framework, and is engineered to maintain the performance and reliability of business-critical applications. With this integration customers of Siebel Systems and MITEM can access information stored in legacy systems through Siebel eBusiness Applications, avoiding the need to display multiple windows from different data sources. The validated MitemView Connector allows Siebel eBusiness Applications to be integrated with a broad range of mainframe and mid-range systems without requiring changes or additions to those systems.

“Independently, MITEM and Siebel Systems are both leaders in their respective segments of the e-Business software market,” explains Martin Fincham, vice president of marketing for MITEM Corporation. “Together, we offer our customers a pre-built product integration that enables faster system deployment at a lower cost of implementation. With its rigorous testing, this validation also acknowledges MitemView as a best-of-class solution for Siebel eBusiness Applications to legacy integration.”

“MITEM has shown commitment to the Siebel Validation Program by originally validating their solution with Siebel 99, and now also with Siebel 2000. Such commitment is characteristic of a company that shares Siebel Systems' focus on 100% customer satisfaction,” said Michael Straub, director of Alliances Technical Services at Siebel Systems.

Siebel Systems forms alliances with proven technology leaders to deliver tangible business benefits throughout the enterprise. The Siebel Validation Program applies rigorous technical scrutiny to evaluate and document integrated third-party solutions. By choosing Siebel eBusiness Applications and Validated partner solutions, Siebel Systems' customers can pursue a best-of-class software acquisition strategy and quickly deploy the very best solution available.

About MitemView

MitemView is a real-time, message-oriented integration system that is used to create new composite applications from existing legacy system assets. MitemView is unique in combining a powerful message-processing engine with an event-driven application framework. MITEM has engineered MitemView to preserve the performance and reliability of business-critical applications. By adopting a non-invasive approach to integration, MitemView is able to interface with any existing system regardless of the underlying operating system, programming language, database, or communications protocol. Composite applications built with MitemView can be deployed using desktop, server or Web centric architectures for maximum suitability.

About MITEM

MITEM Corporation is a leading provider of legacy integration software for conducting real-time e-Business. MITEM's patented technology - MitemView - is used by organizations to create new composite applications that improve the efficiency and productivity of their people, systems, and processes. MITEM's global direct customer base includes more than 100 customers such as American Electric Power, Cendant, Entergy, Fiserv, General Electric, Lincoln National, Lockheed Martin, London Electricity, Panasonic and Swiss Life. MITEM's key go-to-market business partners include Matrix One, Siebel Systems and TIBCO Software. Headquartered in Menlo Park, California, MITEM can be contacted at (650) 323-1500 or on the web at www.mitem.com
